

A pixel art landscape featuring a large green tree on the right, a blue sky with white clouds, and a green field. A diagonal line runs from the top right to the bottom left. The text 'RE-LEAF' is centered in the middle.

RE-LEAF

Gamified Platform for Environmental Education Learning

PROBLEM STATEMENT ID:-SIH25009

TEAM ID:-
VH6_PIET_217

TECHNICAL APPROACH

Methodology:-

1

User onboarding and profile creation.

2

Lessons as games: level-based quizzes, simulations, and digital labs.

3

Real-time leaderboards, progress tracking, and peer collaboration.

4

Integrated interactive AR scan feature which would segregate garbage

FEASIBILITY AND VIABILITY

Feasible with current technology (web/mobile, cloud, AI); modular integration allows scaling.

Potential challenges: Digital access disparities, content localization, privacy concerns, and engagement sustainability.

Strategies:-

- 1 Offline content features for limited internet.
- 2 Integrated AI chatbot for seamless doubt solving
- 3 Other essential and intervening learning features like:- Clans, Communities, quizzes and riddles.

IMPACT AND BENEFITS

Potential Impact:

- Creates awareness and understanding of environmental issues among youth.
- Encourages active participation in sustainability initiatives.
- Builds a community invested in positive ecological change.

Benefits:

- **Social:** Promotes youth activism, eco-literacy, and teamwork.
- **Economic:** Scalable model for school and NGO adoption; opens opportunities for eco-friendly sponsorship.
- **Environmental:** Direct linkage to real-world improvements through project-based challenges and data-driven impact reports
-
